

আন্তর্জাতিক স্ট্যান্ডার্ড (Airbnb/Booking.com) অনবোর্ডিং ফ্লো এবং **Email + Password & Google Auth** মডেল মেনে সম্পূর্ণ আপডেট করা **Product Requirement Document (PRD)** নিচে তুলে ধরা হলো।

Global Standard Multi-Vendor Platform Specification

Module 1: Universal Auth & Multi-Role Switching

1.1 Universal Signup & Login Flow

- **Unified Signup:**
 - **Option A (Email + Password):** Full Name, Email, Password. Standard registration with **Email OTP Verification**.
 - **Option B (Google OAuth):** 1-Click Signup/Login via Google Account.
- **Default State:** Every registered account starts with the base role: `roles: ["traveler"]`.

1.2 "Become a Vendor" Onboarding Flow (Switch Mode)

Logged-in users can upgrade their account from their Profile Menu via two global CTAs:

-  **"List Your Property"** (For Hotel Owners)
-  **"Host a Tour"** (For Tour Organizers / Guides)

Multi-Step Vendor Application:

1. **Verification Info:** NID / Passport / Trade License document upload.
2. **Business Profile:** Hotel Name & Address OR Travel Agency Name.
3. **Payout Details:** Bank account or Mobile Financial Service (bKash/Nagad) details.
4. **Admin Approval:** Submits application for Admin verification (`is_verified: false`).

1.3 Universal Role Switcher Header

Users with approved vendor status can toggle between views instantly via top navigation bar:

- **Switch to Traveling Mode:** Search trips, view booked tickets, manage personal profile.
- **Switch to Hosting Mode:** Access Hotel Owner Management OR Tour Organizer Dashboard.

Module 2: Hotel Owner Portal (Hosting Mode)

- **Inventory & Room Builder:** Manage room types, amenities, photos, and total room inventory.
- **Dual-Tier Pricing Engine:**
 - `b2c_price`: Public rate displayed to regular travelers.
 - `b2b_price`: Special wholesale rate accessible **only** to verified Tour Organizers when building packages.
- **Availability Calendar:** Lock out specific dates for offline/manual bookings.

Module 3: Tour Organizer Portal (Hosting Mode)

- **B2B Hotel Selection:** Search verified hotels, lock rooms at `b2b_price`, and calculate stay costs automatically.
- **Package Builder (Structured Checklist):**
 - **Trip Details:** Title, Destination, Travel Dates, Max Seats.
 - **Inclusions Checklist:** Select transport (AC/Non-AC Bus, Chander Gari, Boat), stay type, and meal plan.

- **Seat Lock Configuration:** Set `total_package_price` and `minimum_seat_lock_fee` (e.g., ₹ 500 or ₹ 1,000 per seat).

Module 4: Traveler Search & Checkout Flow

- **Search & Filters:** Filter trips by Destination, Date, Price Range, and **"Verified Hosts Only"**.
- **Package Page:** Clear inclusions/exclusions, cancellation rules, organizer badge, and structured FAQs.
- **Seat Lock Deposit Checkout:**
 - Pay deposit via bKash, Nagad, or Cards.
 - Instant downloadable PDF Voucher with QR Code and Organizer contact details.

Module 5: Automated Notifications & Support

- **Email & SMS Infrastructure:**
 - **Email OTP (Resend/NodeMailer):** Registration and password resets.
 - **SMS API (Greenweb/BulkSMSBD):** Automated booking confirmation SMS with Booking ID sent to both Traveler and Host.
 - **Pre-Trip Automated SMS:** Sent 24 hours prior to departure with departure point and guide contact info.
- **Platform Support:** Sticky WhatsApp Admin button on all pages to handle support directly and prevent off-platform bypass between vendor and traveler.

Module 6: Admin Control & Financial Core

- **Host Verification Queue:** Review submitted NID/Trade License documents and toggle `is_verified` status.
- **Automated Commission Retention:** System automatically retains platform fees directly from the seat lock deposit.
- **Payout Release Management:** Admin approves payout transfers to hosts and hotel owners after successful trip completion.

Updated Developer / Agent Implementation Plan

Plaintext

- Step 1: Universal Auth Engine (Email + Password + Email OTP + Google OAuth).
- Step 2: Database Schema (Multi-role Array Architecture: roles: ["traveler", "tour_organizer"]).
- Step 3: Multi-Step "Become a Host" Onboarding Flow & Admin Approval Queue.
- Step 4: Dual-Tier Hotel Engine (B2C and B2B pricing logic).
- Step 5: Package Builder Engine with Inclusions Checklist & Seat Lock Pricing.
- Step 6: Payment Gateway Integration (bKash/Nagad) for Partial Seat Locking.
- Step 7: Automated Notifications Setup (Email OTP + SMS API).
- Step 8: Universal Header Role Switcher & Admin Payout Dashboard.
